Prof. PhD. Samuel Ortega-Farias
Editor-in-Chief
Irrigation Science

Dear Editor,

I hereby enclose the manuscript entitled “Agronomic performance and water-use efficiency of rice under reduced irrigation volumes in the Chira Valley, Peru” by Lesly Alberca *et al.* to be considered for publication in *Irrigation Science*.

Our study evaluated the effects of different irrigation water volumes on the agronomic performance, grain quality, yield, and water-use efficiency of rice (*Oryza sativa* L.) under the conditions of the Chira Valley, Peru. The results showed that reducing irrigation water volume by up to 23.5% did not significantly affect grain yield or quality, while increasing water-use efficiency by up to 26% compared with conventional irrigation practices.

We think this manuscript is suitable for publication as the research reflects the aims and scope of your journal. We confirm that neither the manuscript nor any parts of its content are currently under consideration for publication with or published in another journal. All authors have approved the manuscript and agree with its submission to *Irrigation Science*.

Yours sincerely,

Sebastian Casas-Niño
